### SIT TIGHT-DON'T ROCK THE BOAT !

The European war has called forth all sorts of editorial comment from the press of this country. But the Chicago Herald, the great independent newspaper of the Windy City, in its issue of August third, contained editorial advice that should be considered by every lover of peace in this country. The Herald, under the caption, "Sit Still—Don't Rock the Boat," said:

Sit tight! Don't rock the boat! That's the watchword today. That's the first duty of every American at this moment. That's what this country needs to keep it straight and safe and true to its course—absolutely all it needs.

Business conditions are sound. We have one of the greatest

Business conditions are sound. We have one of the greatest grain crops in history. Its value has already greatly advanced. We have a sound financial system, backed by the greatest store of gold in the world. Our banks are solid, safe. There is nothing the matter with the United States.

War will mean an unprecedented demand for supplies. Experts declare American business will feel a great impetus. While other nations destroy, this country will produce. While other nations are armed camps, this country will be a farm, a factory, a forge. Trade extension is predicted in all directions. The immediate for the country will be a farm, a factory, a forge.

diate future is plain. The national administration is acting wisely, promptly. The sum of \$500,000,000 is available, under the Aldrich-Vreeland act, for an emergency. The organization of the reserve board will soon be complete. This will enable us to deal more effectively with the outflow of gold. Plans are perfecting to permit American registry of foreign vessels. This will protect and develop our commerce.

We are preparing to maintain strict neutrality. Questions may arise with foreign nations as to what constitutes contraband. Such arise with foreign nations as to what constitutes contraband. Such questions cannot conceivably involve us in difficulties. They will be settled by the ordinary processes. The general principles of neutrality and neutral commerce are plain. The United States will adhere rigorously to them. Friendly intercourse, as far as circumstances permit, will be its rule and its procedure.

Stock exchanges have closed—a wise precaution. This country gament he the discourse of the law hours.

cannot be the dumping ground of the large body of securities that war-mad Europe is anxious to convert into money. The closing is temporary. Elsewhere there is no prospect of interference with the orderly processes of American business. Stable conditions are here. All we have to do is to keep them stable.

The administration has decided to appeal officially to the public to help maintain existing satisfactory conditions. The public cannot fail to respond. The only danger is one which it may create itself. Its course is simple. All it has to do is to sit tight, to do nothing to disrupt the fortunate condition in which this country

happily finds itself. Don't rock the boat—that's the central idea! The swell from the great battleship "Europe," will be felt. But it will not hurt us. It need not even break over the sides. There's nothing the matter with the boat that we are in. Straight and strong, well-seamed, well-caulked, well-timbered, with reasonable guidance it will bear us safely and prosperously through.

Sit tight! Don't rock the boat! Keep its head well up against the sea! Don't let it get into the trough of the waves! Let every man realize that at this moment calm confidence and calm thankfulness are the first duty. They are absolutely justified by the favorable situation in which we find ourselves. They are the certain guarantee of a continuance of these conditions.
